DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 and 25 of copending Application No. 10/816,263. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the claims overlap.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 1-13 contain allowable subject matter. Specifically, the prior art does not teach or fairly suggest a playing surface comprising (a) a top layer of a resin impregnated textile, (b) a layer of resin bonded particulate rubber bonded thereto, and (c) a fibrous random pile mat comprising a random pile layer and a resin impregnated backing layer. While the prior art of Burke (US 6,472,041) teaches a pile layer having a resin impregnated backing that has infill particles bonded with a binder resin and a top wear coating layer, Burke does not teach or fairly suggest that the top wear coat layer is a resin impregnated textile. Additionally, there is not proper motivation to modify the top wear coat layer of Burke to include a textile reinforcement. Thus, claim 1 contains allowable subject matter. Furthermore, there is nothing in Burke to suggest adding an additional surface carpet layer as recited in claims 2 and 11-13 or a second random pile mat as recited in claims 9 and 13. Therefore, claims 1-13 contain allowable subject matter.
